Welcome to Transportation Asset Management Today, the knowledge site sponsored by the AASHTO Subcommittee on Transportation Asset Management! This knowledge site is dedicated to the open exchange of information and knowledge about transportation asset management. Participation is open to the public. Content found in the Topic Areas may not necessarily reflect the opinion or policy of AASHTO, the Transportation Research Board, or the Federal Highway Administration. Your feedback is important to us. Please click here to answer four multiple choice questions, and optionally send a text message to the site administrator.
Visit the topic areas below and enjoy the experience! Click on any of the topic area names to join a discussion in progress, initiate a new discussion, comment on a work-in-progress, or check out the reference documents and links. For regular email updates about each topic, fill out the "My Interests" form accessible below. Once registered, you will receive daily notification of any new reference materials or discussion topics posted in your areas. You also have the option of including your name in the site's growing directory.

• About Asset Management
Office of Asset Management
The mission of the Office of Asset Management is to provide leadership and expertise in the systematic management of highway infrastructure assets. The Office has three key responsibilities:
• Provide national leadership in asset management principles for highway program administration;
• Develop asset management policies for pavement, bridge, and system preservation; and
• Partner with the American Association of State Highway and Transportation Officials (AASHTO), other FHWA offices, and others to conduct nationwide programs.
Features:
• Asset Management State Contact List
• Pavement Preservation Checklist Series
• Asset Management Pay Studies
• Asset Management Today
• Available Asset Management Tools
• Core Curriculum Matrix Development
• FHWA Asset Management Position Paper
• Highways for LIFE
In fulfilling these responsibilities, the Office of Asset Management serves as an advocate for asset management, system preservation, pavement management and analysis, bridge management and inspection, and construction and maintenance activities, as well as technology development, outreach, and partnering initiatives.
The information is categorized in three general topic areas:
• System Management and Monitoring
• Construction and System Preservation
• Evaluation and Economic Investment

Welcome to the TRB Online Directory
The TRB Online Directory allows you to browse or selectively search through TRB's committee structure to find detailed information on committees, including committee scopes, committee membership rosters, and links to committee homepages. Included in the directory are standing committees, project-based committees, and TRB governing committees. Also available are lists of TRB staff, TRB organizational affiliates, and TRB representatives in universities and state departments of transportation throughout the country. Extended directory information is available only to authorized users through our secure login (the LOGIN button is located in the upper right on this webpage).
To use the online directory select an area below.

TRB 2006 Summer Conference
La Jolla, California
July 9-11, 2006
This year's conference will include the annual TRB Summer Ports, Waterways, Freight, and International Trade Conference, and the Joint Summer Meeting of the TRB Planning, Data, Finance, Administration, Freight, and Management Committees. The conference will provide attendees with a unique opportunity to attend sessions addressing subjects of common interest, participate in any of the more than 30 TRB standing committees meeting in conjunction with this conference, and networking with peers across a broad array of related topic areas. Click here to register.

Website: Performance Measurement
Scope: This committee is concerned with the use of performance measurement in a broad range of transportation applications. The committee spans the range of performance measurement in transportation through its membership and joint activities with committees across the TRB spectrum. The committee provides a forum for the exchange of ideas, sharing experience, developing research topics and statements, developing and disseminating resource material.

Missing link!!
Scope: The committee brings together practitioners and researchers to consider current asset management practice across all transportation modes, develops research needs, and encourages dialog and wide dissemination of information through meetings, workshops, conferences, and publications. Asset management is a systematic process for maintaining, upgrading and operating the physical assets of the transportation system by employing engineering principals, economic theory, sound business practice, and information systems to determine optimal short and long-term resource allocations. The committee recommends how the topic can best be addressed within TRB.

Performance Measurement Exchange - Microsoft Internet Explorer provided by Alberta Transportation
PerformanceMeasurement Exchange
Federal Highway Administration
Home › System Performance Measurement ›
The System Performance Measurement section of the website is intended to provide a forum for practitioners that are interested in performance measurement issues, specifically related to the role of performance measures in evaluating the effectiveness and efficiency of transportation systems and services. System performance measures address the physical condition (e.g., pavement quality, bridge condition, transit fleet age, etc.) as well as the operational performance of a multimodal transportation system (e.g., delay, on-time performance, etc.). We hope you make the most of this opportunity to share your ideas and even your failures, so that we all can benefit from our collective experiences. With the ever-increasing budget tightening in most states, this process can benefit all state DOT's with the overall goal of maximizing the utilization of scare resources.
Facilitator for this topic: Larry Jones, Virginia DOT

Welcome to Transportation Asset Management Today, the knowledge site sponsored by the AASHTO Subcommittee on Transportation Asset Management! This knowledge site is dedicated to the open exchange of information and knowledge about transportation asset management. Participation is open to the public. Content found in the Topic Areas may not necessarily reflect the opinion or policy of AASHTO, the Transportation Research Board, or the Federal Highway Administration. Your feedback is important to us. Please click here to answer four multiple choice questions, and optionally send a text message to the site administrator.
Visit the topic areas below and enjoy the experience! Click on any of the topic area names to join a discussion in progress, initiate a new discussion, comment on a work-in-progress, or check out the reference documents and links. For regular email updates about each topic, fill out the "My Interests" form accessible below. Once registered, you will receive daily notification of any new reference materials or discussion topics posted in your areas. You also have the option of including your name in the site's growing directory.

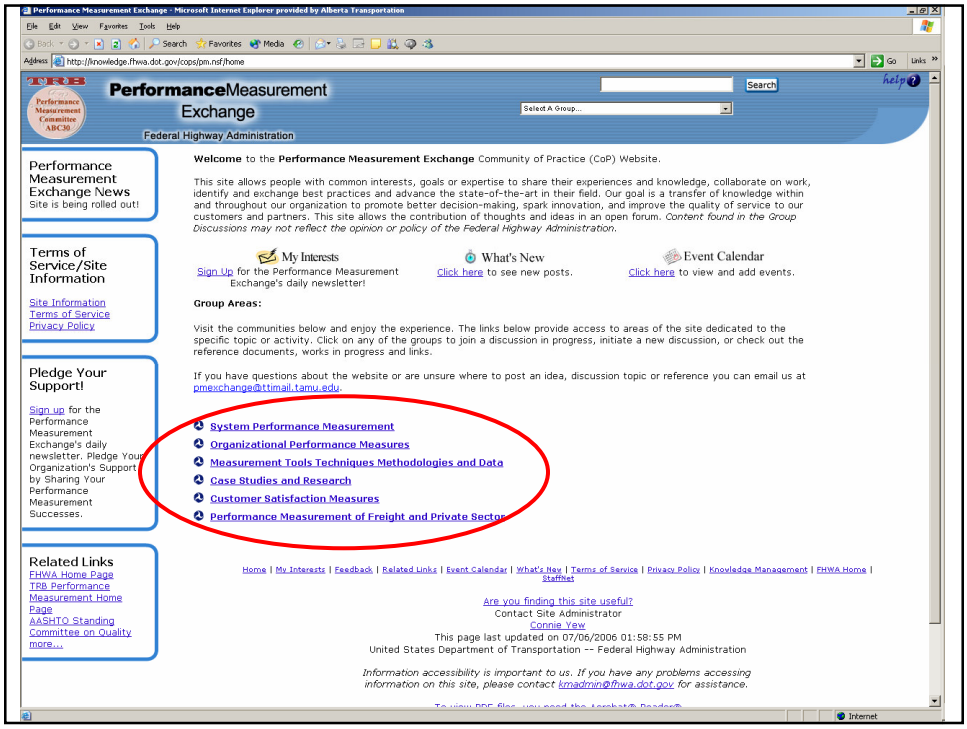
r. Local Government Perspectives
s. Education



# POTENTIAL TAMT TOPIC AREAS

- **Asset Management – General**
- **Best Practices**
- **Education & Innovation**
- **Infrastructure Data** (also reference ABJ committee websites)
- **Infrastructure Preservation**
- **Performance Measures** (suggest using ABC30 website discussion area)
- **Research**
- **Systems & Tools** (also reference applicable pavement, bridge and other TRB infrastructure management sites)

Ideally, a short description should be included under each topic area to give the user some guidance as to what is included in this topic area. If there is not a suitable topic area, the user would use the General category.

# OTHER ISSUES

- The next page on directories only works once. Therefore, not all of the information is accessible.
- Under References, the View by Date and View by Category sorts do not appear to be working.
- The TAMT website does not seem to have a lot of recent entries (a lot of the websites are like this). Any suggestions for encouraging its use.
